**Connecting Microscope Cameras HDCAM6B & HDCAM7 to a Windows Computer**
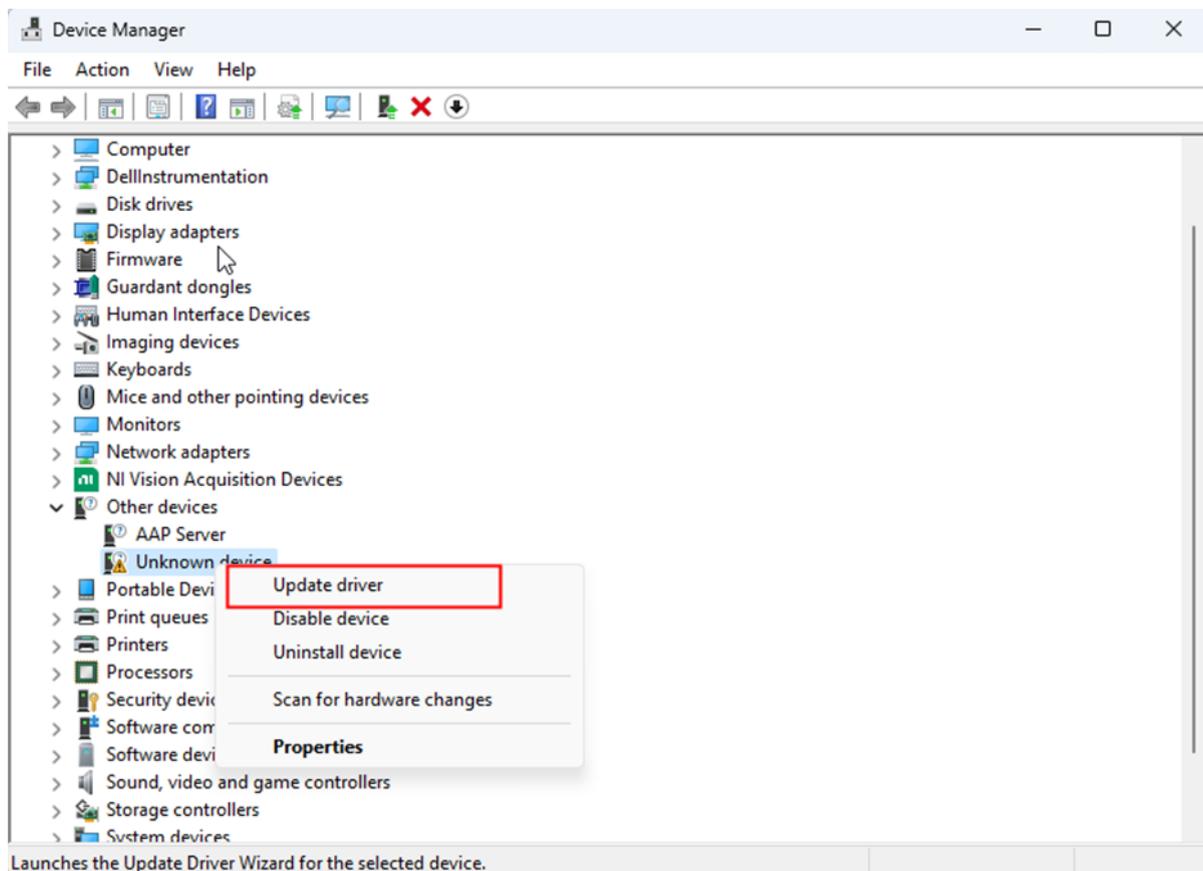

1. Download ToupView software.

2. Install software onto your computer. (Make sure the software is closed before
   connecting the camera.)

3. Connect the camera to your computer using the USB port, and turn on the camera.

4. Open the ToupView software, and the software should automatically detect your
   camera. If the software does not automatically detect your camera, follow the steps
   described in the subsequent pages to allow your computer to recognize the camera.
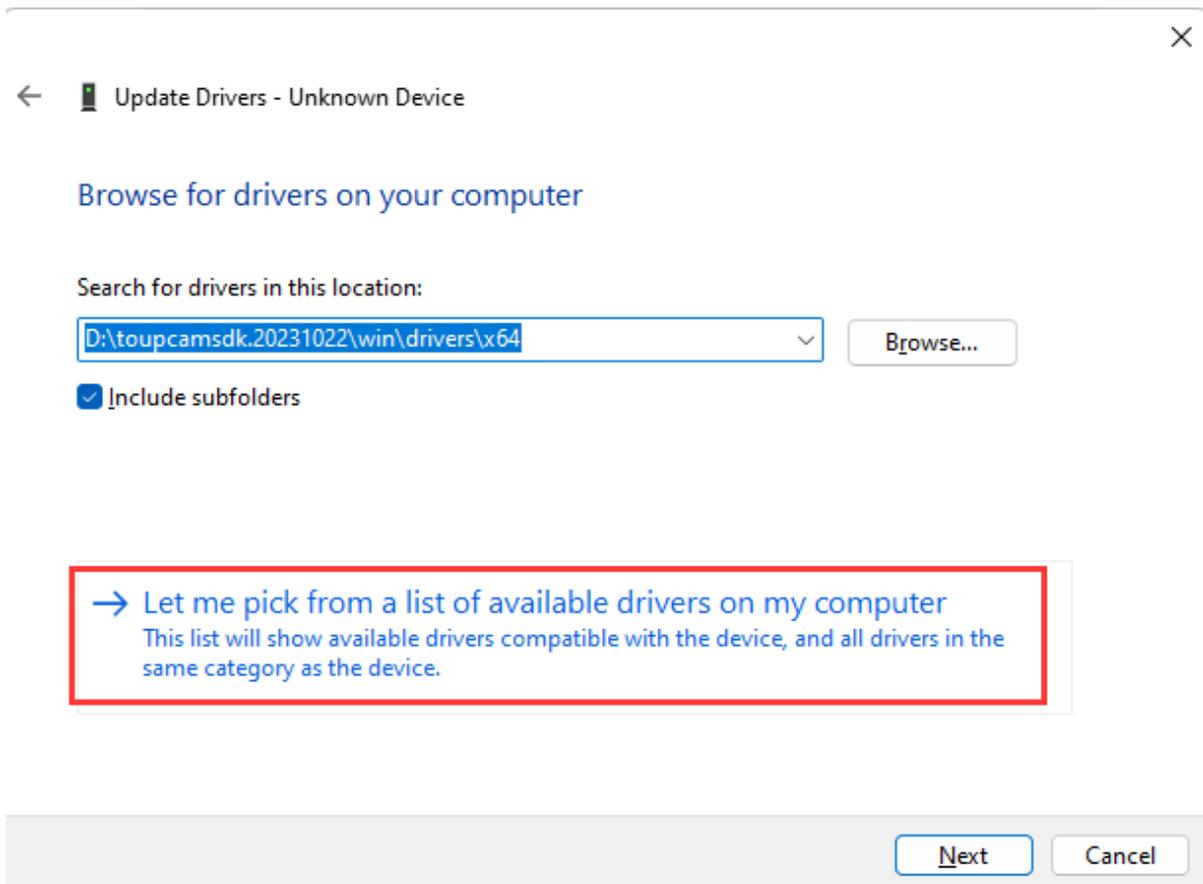

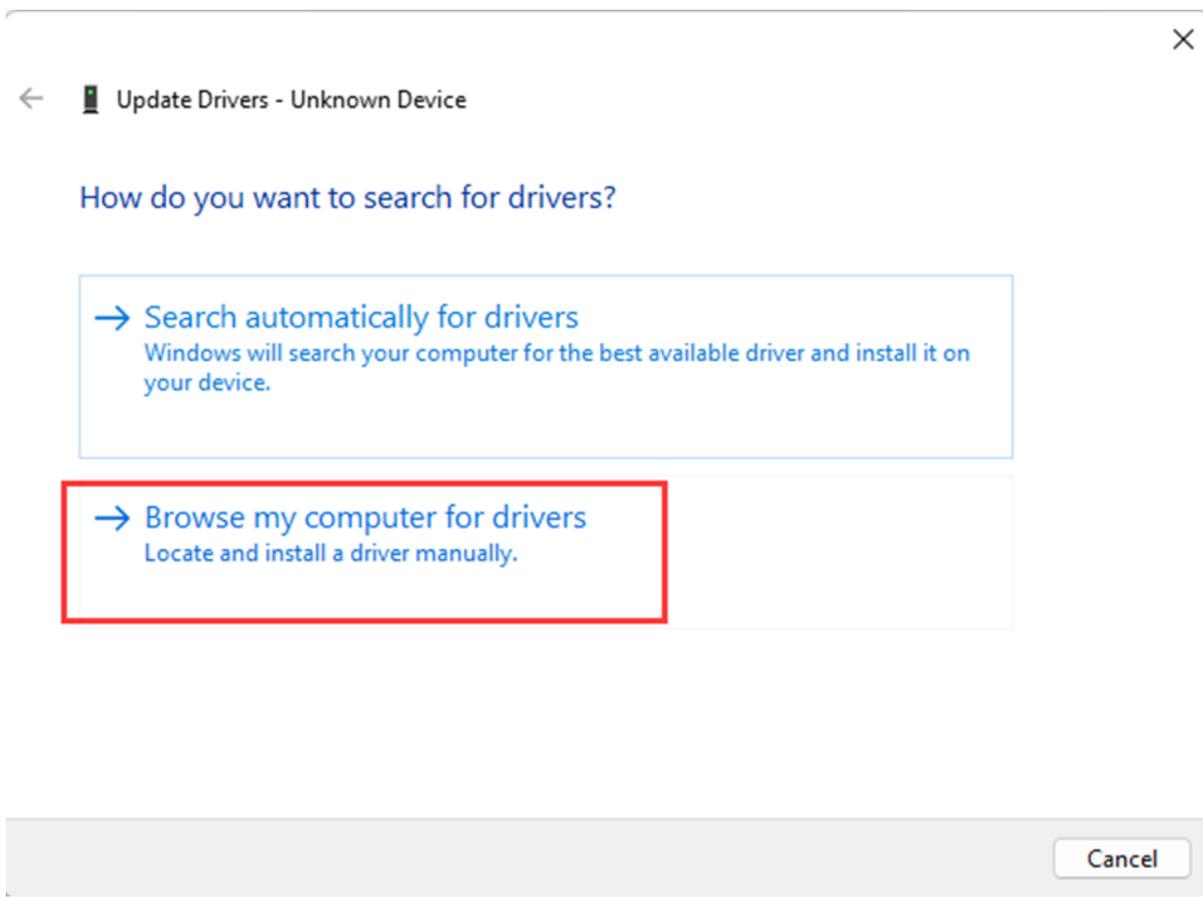

How to use winusb driver on win8 and above system
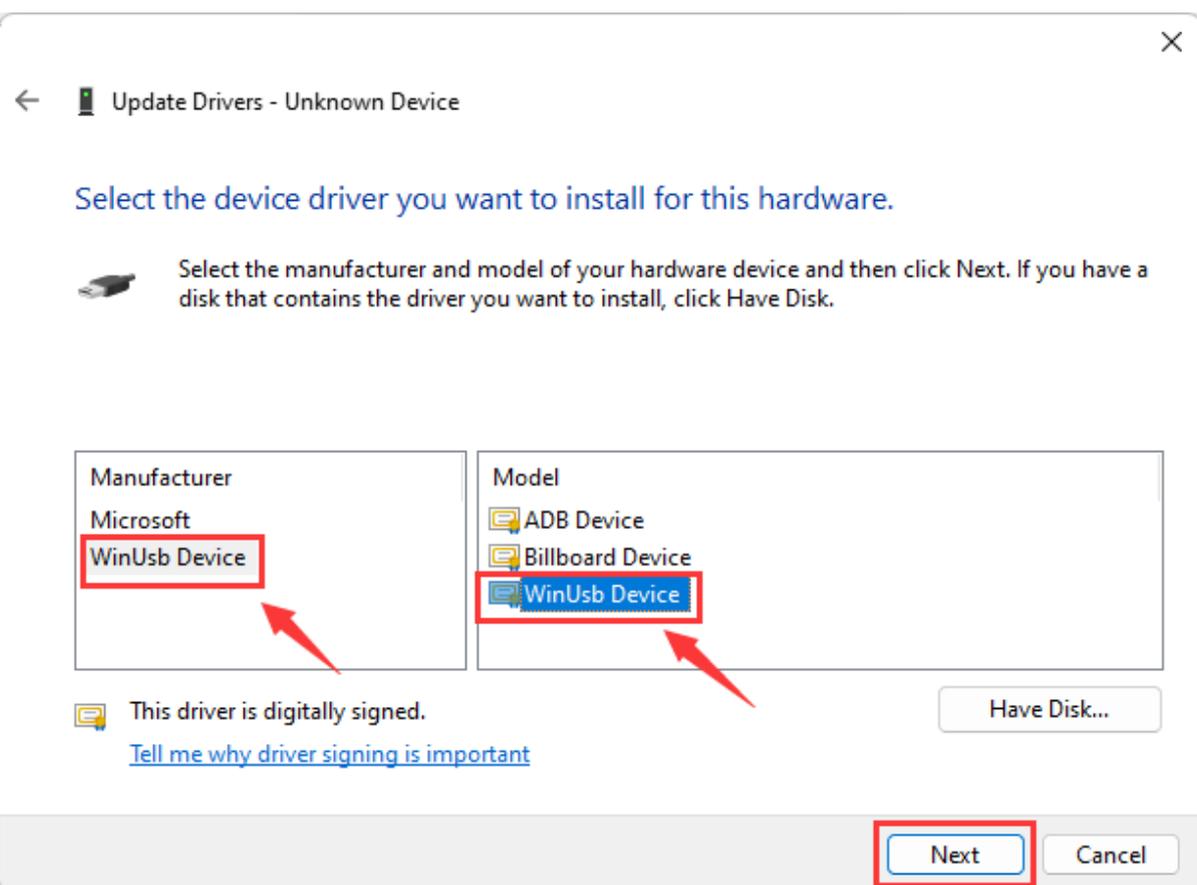

1、Find unrecognized cameras in Device Manager

2、Right-click to update the driver

×

← 🔲 Update Drivers - Unknown Device

How do you want to search for drivers?

→ **Search automatically for drivers**
Windows will search your computer for the best available driver and install it on your device.

→ **Browse my computer for drivers**
Locate and install a driver manually.

Cancel

← 🔲 Update Drivers - Unknown Device

Browse for drivers on your computer

Search for drivers in this location:

D:\toupcamsdk.20231022\win\drivers\x64   ⌄   Browse...

☑ Include subfolders

→ **Let me pick from a list of available drivers on my computer**
This list will show available drivers compatible with the device, and all drivers in the same category as the device.

Next   Cancel
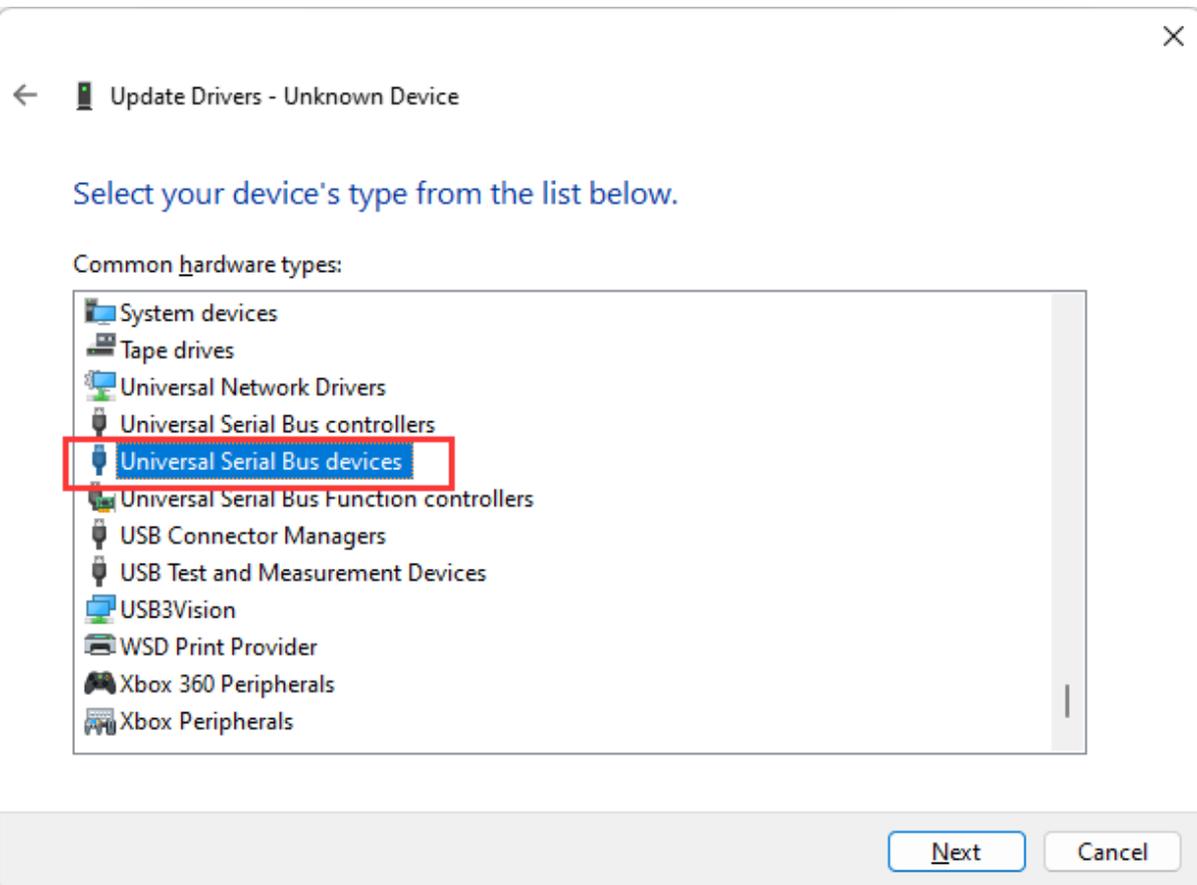

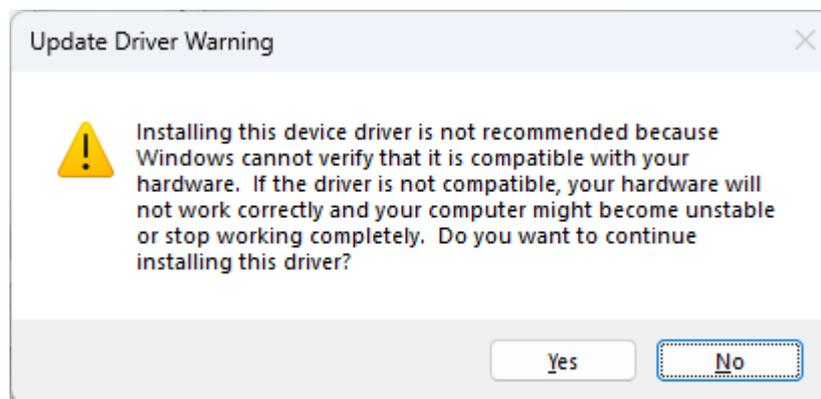

3、 Select the universal Serial Bus device

4、When a warning is displayed, click Yes to forcibly use the winusb driver

5、 Finally, the camera is recognized as a winusb device in the Device Manager
